Deep venous obstruction: towards optimizing treatment strategies

1. De behandeling van diep veneuze obstructies is veilig en effectief.
2. De evaluatie van de post trombotische veranderingen in de Vena Femoralis Communis zijn cruciaal voor het behandelplan.
3. De klinische relevantie van een geïdentificeerd May-Thurner syndroom is moeilijk te bepalen.
4. Kwaliteit van leven is een belangrijke parameter ter evaluatie van een diep veneuze interventie.
5. Patiënten met diep veneuze problematiek moeten in dedicated centra behandeld worden.
6. Elke patiënt met een diep veneus probleem heeft recht op de meest specialistische zorg.
7. Doctoren moeten alle kanten van een behandeling belichten om shared decision making mogelijk te maken.
8. Niet de behandelkosten, maar de bureaucratie maken de zorg nodeloos duur. - *(emeritus, prof. Dr Kreis)*
9. Een kleinigheidje hou je. - *(vv Noeijt Gedag)*
10. Ik heb het nooit gedaan dus ik denk dat ik het wel kan. - *(Pipi Langkous)*
